Burundi backup for home

Delivery Across Burundi. EASY Returns & ...

5 ???· I just built a small proxmox server for home. It's a 1TB ZFS mirror for root and most VM/CT images (I let the pve installer partition this) and a 4TB ZFS mirror for bulk data. I'm using that for files I share out using a fileserver container and for the data directory for a Nextcloud VM.

What the hell? I can backup homes to other targets, like S3. Hell, It looks like I could even use rsync to create another local copy and then HyperBackup the copy, but that is just madness considering the size of the data. How are we supposed to create local backup tasks for "homes" or a specific user home?
