

Cabo Verde automated vertical storage system

What are vertical storage solutions?

Vertical storage solutions are the best way to make use of every inch of warehouse space you have. We don't mean building out, we mean building up. With products like Vertical Lift Modules and automated storage and retrieval systems (ASRS) from our partners at Modula, we are able to recover up to an incredible 90% of the currently used floor space.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

How can vertical solutions save your warehouse floor space?

Vertical solutions can save up to 60% of your warehouse floor space and dramatically increase the pace of accessing and retrieving items from storage. Our specialists will be happy to develop a solution that meets your specific storage and intralogistics requirements. Contact us for more information and details.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

How does a tornado automated storage tower work?

The Tornado automated storage tower increases range sizes through greater article density up to 90%, while decreasing picking and replenishing times by up to 70%. And with remote support at the touch of a button, this level of productivity is rarely interrupted.

Advantages of Modula storage systems for the pharmaceutical sector. The new line of automatic vertical storage solutions, including the Modula Climate Control, Modula Clean Room, and Modula Dry systems, together with the standard Modula Lift and the compact Modula Slim, represent the best of Modula's technology and innovation.

Vertical Lift Modules (VLMs): VLMs are ideal for vertical storage. They use an elevator system to bring trays with stored items to an access point, optimizing vertical space usage. Vertical and Horizontal Carousels: These rotating storage systems bring items to the operator, minimizing walk time and improving picking speeds.

A vertical lift module, also known as tray lift and lift storage system, is an automated storage system for small parts. A vertical lift module resembles an oversized drawer cabinet made from metal with two large warehouse
