

KASTET PLANENE: Det var full feiring da Beyonder annonserte fabrikkplaner p&#229; Haugland n&#230;ringspark i Tysv&#230;r. N&#229; m&#229; n&#230;ringsparken finne p&#229; noe annet. Her med ordf&#248;eren i Tysv&#230;r, Sigmund Lier (Ap) (f.v.), dav&#230;rende sjef Svein Kvernstuen og sjef for n&#230;ringsparken, Tiril Fjeld. Foto: Beyonder

Beyonder and Midwest Energy have entered into an agreement to start planning giga scale battery production in India, based on Beyonder's unique and patented technology. The agreement was signed at Beyonder's ...

Hangzhou Lin'an Beyonder Power Co.,ltd, focuses on the design, research and development, production and sales of lithium-ion power batteries and related power products. The company is located in Hangzhou of Zhejiang Prov-ince ...

Beyonder wants to keep its battery production in Norway, based on the government's signals of a majo. The Rogaland duo strengthens Norway's position in the World Cup on green large-scale industrial establishments. This ...

Exciting news from the Nordic batter industry. On 30 October 2023, Beyonder, a Norwegian cell development and manufacturing company, launched it's first certified product "BePowered". It is a 31Ah (1C) lithium-ion pouch cell (detailed specifications found here), with more than 10 000 cycles, with 5C/5C charge and discharge capabilities. Beyonder takes a ...

?????(?:The Republic of Cabo Verde,????Rep&#250;blica de Cabo Verde),????,????????????????????????????,????????????( ...

Sol e praia, trilhos de montanha, paisagens de uma natureza que t&#227;o facilmente brota por todo o lado e uma riqueza de costumes e tradi&#231;&#245;es que n&#227;o se traduz em pre&#231;o algum: Cabo Verde &#233; um para&#237;so que descansa &#224; beira-mar. Com a morabeza das gentes e a magia que s&#243; se encontra em Ilhas de sol e mar, este pa&#237;s-arquip&#233;lago &#233; um universo de experi&#234;ncias a ...

Beyonder&#180;s battery technology is produced using ecological materials such as renewable energy and sawdust. With its clever combination of a Li-ion cell and a Li-ion capacitor it perfectly suits many applicationsThe batteries are non ...

The main goal of the project is to develop an upscaled pilot production line for battery cells and supercapacitors. This includes small-scale production of BEYONDER's own super-active carbon (SAC), electrodes made with SAC and electrodes made with silicon. These components are to be implemented into

battery cells for customers to test.

The objective of the cooperation is to further establish and commercialize access to critical carbon materials for Beyonder's BePowered products and the next generation battery chemistries. - Local and sustainable battery production will be key as EU's Critical Raw Materials Act (CRMA) will enhance the strategic importance for the battery producers to team ...

The key features of Beyonder's Li-ion battery include fast charging, exceptional longevity, and sustainable chemistry. With a full charge or discharge time of 10-12 minutes, the battery ensures swift access to energy. Its lifespan of over 10,000 cycles outperforms conventional batteries, promising durability and reliability. ...

Beyonder is an innovative Norwegian Energy Storage-Technology company, focused on high-capacity batteries for industrial use. We have a clear strategy and ambition to become one of the world's most sustainable high-capacity battery cell technology company, increasing the use of renewable energy in industrial applications world-wide.

HEROES X Beyonder = Innovative stationary storage systems ? Since May 2021, Beyonder has been the initiator and coordinator for HEROES H2020, a large EU-funded project focusing on developing ...

Beyonder's battery technology is produced using ecological materials such as renewable energy and sawdust. With its clever combination of a Li-ion cell and a Li-ion capacitor it perfectly suits many applications. The batteries are non-flammable and can be fully charged in two minutes and recharged up to 100 000 times, thus reducing the need for ...

Beyonder and Bergen Carbon Solutions ("BCS") have signed a letter of intent (LOI) to establish a local value chain of green carbon for Beyonder's BePowered product- and development work for next generation battery chemistries. - Securing local access to sustainable carbon materials for our batteries are important, and the BCS novel technology to develop a ...

11 September 2024. Beyonder and Bergen Carbon Solutions ("BCS") have signed a letter of intent (LOI) to establish a local value chain of green carbon for Beyonder's BePowered product- and development work for next generation battery chemistries. - Securing local access to sustainable carbon materials for our batteries are important, and the BCS novel technology to ...
