

NextEra gets go-ahead for 300MW extension to California BESS . In related news, the US Bureau of Land Management (BLM) has approved the Sunlight Storage II Battery Energy Storage System project, an ...

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy storage system (BESS) capacity, the world's largest. The 4,600-acre project in ...

Rev Renewables" LeConte project in Calexico, along the US-Mexico border in California. Image: Wartsila. Investor-owned public utility Southern California Edison (SCE) is seeking approval from the California Public Utilities Commission (CPUC) of two new resource adequacy (RA) agreements covering 750MW of nameplate battery storage capacity.

Augmentation at the Vistra Moss Landing Energy Storage Facility in California has been completed, with the world's biggest battery energy storage system (BESS) now at 400MW / 1,600MWh. ... There is a 10-year agreement for Resource Adequacy in place with PG& E for the Phase 2 capacity, while Phase 1 has a 20-year agreement along similar lines ...

Hanwha Energy Corporation-owned 174 Power Global has secured a CAISO interconnection agreement for the entire Atlas development covering 3200MW of solar and 1920MW of battery storage capacity (queue no. 1402). Construction on the northern portion of the Atlas development is expected to commence this year. PG& E also signs 100MW+ in RA ...

Eolian CEO Aaron Zubaty stated: "Following on to the 50MW Padua 1 project already under construction for CPS Energy, this additional 350MW of four-hour duration battery energy storage will provide new dispatchable capacity to the San Antonio area by mid-2026, representing the single largest buildout of standalone battery energy storage in ...

Update 28 January 2021: An AES Corporation representative told Energy-Storage.news that the new natural gas plant at the Alamitos site went online in early 2020 and offered a bit more clarity on the applications and benefits of the battery project, as well as sharing some photographs of the project, which we've also added: "The BESS is sited at the Alamitos ...

300MW/1,200MWh worth of BESS capacity at US\$18.76/kW-month fixed rate . The proposed Roadhouse Energy Storage project will utilise lithium-ion battery technology encompassing a 20-acre site located ...

Energy storage is already proving its worth in the state. Energy-Storage.news reported yesterday that

California battery storage capacity Northern Mariana Islands

according to CAISO, California's main grid and wholesale markets operator, battery storage deployments grew 12-fold on its network in 2021 from 2020 figures.

A site map of the proposed project in Kern County, California. Image: Kern County Planning and Natural Resources Department. The Kern County, California hybrid facility will have the capability to generate up to 2GW of solar power co-located with up to 2GW of battery energy storage system (BESS) capacity, spanning approximately 12,875 acres of privately ...

Commissioned at the start of this year, the Alamos Battery Energy Storage System in California is a landmark project for the industry in having competed against natural gas to provide peaking capacity for the grid. Andy Colthorpe finds out the project's backstory from Fluence's Ray Hohenstein and AES' Mark Miller.

Large-scale battery storage systems will be used to increase the efficiency of natural gas peaker plants in California, resulting in reduced emissions. Battery storage solutions and software provider FlexGen announced this morning that it has been contracted by independent power producer (IPP) Middle River Power for the projects.

On July 11, the California Independent System Operator hit a new record: more than 5 GW of battery storage capacity fully integrated into the electrical grid and available for dispatch. Elliot Mainzer, the ISO's president and chief executive officer, said that in just three years, the grid catapulted from a mere 500 MW of storage to 5,600 MW ...

The two projects (pictured) are sited at a Southern California Edison substation in Santa Ana, California. Image: Convergent Energy + Power. Convergent Energy + Power has celebrated the successful commissioning ...

The LS Power-Diablo Battery Energy Storage System is a 50,000kW energy storage project located in Contra Costa County, California, US. ... The project is a part of LS Power's Capacity Storage Agreement (CSA) with California utility Pacific Gas and Electric (PG& E). Under the agreement, Diablo Energy Storage, LLC, a subsidiary of LS power will ...

The two projects (pictured) are sited at a Southern California Edison substation in Santa Ana, California. Image: Convergent Energy + Power. Convergent Energy + Power has celebrated the successful commissioning and start of commercial operations at two battery energy storage system (BESS) projects with a combined capacity of 60MWh in California, US.
