

# Campeador green energy Uruguay

What is the goal of a green energy project in Uruguay?

Project goal: Reducing carbon dioxide emissions, achieving energy independence and producing enough green energy to export to other countries. Project partners: Uruguay is being supported by the International Climate Initiative (IKI) of the German Environment Ministry, as well as private and public partnerships in the country.

Should Uruguay switch to green electricity?

Uruguay, one of South America's smallest countries, is attracting outsized attention over its transition to green electricity. It didn't happen simply by building a bunch of wind and solar farms, the architect of the strategy said, but by rethinking the entire energy system. And, he said, other countries could do that too.

Does Uruguay have a green energy system?

Capurro isn't the only one who has been convinced. The transition to green energy sources means that many schools now have a stable electricity supply, and it's also made Uruguay less dependent on fossil fuel imports.

Does Uruguay have a wind farm?

Cover Image: Wind energy supplies up to 40% of Uruguay's power needs. This wind farm, operated by the public utility UTE, is located in the southern Uruguayan department of Maldonado. Credit: UTE

Does Uruguay export energy to Brazil and Argentina?

Once a net importer of energy, Uruguay now exports its surplus energy to neighbouring Brazil and Argentina. Help us continue providing unbiased, in-depth coverage on climate change. Your donation ensures our newsroom remains independent and free from corporate influence.

This is due to its large amount of renewable energy sources and biogenic CO<sub>2</sub>, as well as its institutional stability and strong democracy. It is from this conclusion that the present 2040 roadmap is proposed. Uruguay's Green Hydrogen and Derivatives Roadmap under consultation until August 15, 2023. Its final version is now published.
