How did the World Bank help the government build a new solar park?

To fast track its construction, the World Bank directly supported the government in procuring resources and supplies. "It's a great joy," says Thomas Bissafi, the village chief of Danzi, a town in Central African Republic about 18 kilometers away from the capital of Bangui that is now home to a new solar park. "It's helping to develop the country."

How will the Danzi solar plant benefit the government?

The Danzi solar plant will replace more than 90% of the energy currently produced by diesel, resulting in annual savings of \$4 million in fuel costs for the government. It will also contribute to a net reduction in emissions of 670,674 tons of CO2.

Will a large solar plant in Bangui help other countries?

Residents in Bangui used to face up to 16 hours of load shedding with health facilities, schools, and shops with no electricity. Now they will have much greater access to power, driving productivity and job creation. The commissioning of such a large solar plant in CAR provides hope for other countries.

The Central African Republic is about 7,400 miles from the USA (along the surface of the world), but the actual flying distance is longer because of indirect or layover routes. One normal trip -- a flight to Bangui, the capital of the Central African Republic, via Washington, D.C. -- takes about 19 hours and 40 minutes, including layovers.

The Central African Republic (CAR) is a perennially weak state that sits at the crossroads of ethnic and linguistic groups in the center of the African continent.
