

Who is Centrica Energy?

Centrica Energy is our global energy trading and logistics arm. We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches.

Does Centrica have a role in the energy transition?

Centrica has a role at every step of the energy transition. When it comes to energy, we make it, store it, move it, sell it and mend it. Find out how we're energising a greener, fairer future. Net Zero isn't next, it's now. Join us on our mission to energise a greener, fairer future. Supporting our customers through...

Who owns Kuciurgan power plant in Moldova?

Russian energy giant Gazprom supplies the gas-operated Kuciurgan plant, which generates electricity that powers a significant portion of Moldova proper. The plant was privatized in 2004 by Transnistrian officials and later sold to a Russian state-owned company. Moldova doesn't recognize the privatization.

What is Centrica's strategy?

Our strategy is driven by our purpose of energising a greener, fairer future. © Centrica plc 2024. All rights reserved.

Why is Moldova imposing a state of emergency?

More than half the world's population sees AP journalism every day. Moldova's parliament has voted in favor of imposing a state of emergency in the energy sector over fears that Russia could leave the European Union candidate country without sufficient natural gas supplies this winter.

The Panoramic Power PAN-12 Wireless Sensor is appropriate for granular monitoring of individual circuits and devices with a max hot-wire outer diameter of .74 inches (18.8 mm), measuring currents of 0-225 A. o Non-invasive - snaps and fits without disconnection o No maintenance - self-powered o High accuracy o Wireless - no wiring, unlike standard CT-based ...

Centrica is pleased to announce the extension of the lives of its four operational Advanced Gas-cooled Reactor ("AGR") nuclear power stations alongside its partner, EDF. Heysham 1 and Hartlepool are now expected to generate electricity until March 2027, one year later than previously expected.

Mark Futyan, Merchant Power Director of Centrica's Distributed Energy & Power business said: "It's great to be starting work on site after such a long period of uncertainty for the team here at King's Lynn. Once again, this power station will be able to play its part in helping to keep the lights on for hundreds of thousands of local ...
