

Is Chile a good place to invest in solar energy?

Additionally, according to the World Bank's Doing Business Report 2017, Chile continues to be a top performer in Latin America and the Caribbean and ranks in fifty-seventh position. In particular, the Atacama Desert potential for solar energy has been very attractive to local and foreign investors.

Can solar technology be developed in the north of Chile?

The North of Chile also hosts the Atacama Desert, which has one of the highest rates of solar radiation in the world. The potential for the development of solar technologies in the North is vast and represents a sensible alternative to overcome the barriers the mining industry faces.

How many solar projects are there in Chile?

The total Chilean solar portfolio is comprised of approximately 360 megawatts (MW) of generation, including more than 250 MW of operating projects and 110 MW of projects currently in or about to enter construction. The portfolio is forecast to be fully operating by the second half of 2023.

Does Chile have a solar energy resource?

We present in this paper a public on-line, validated database of the solar energy resource for the entire Chilean territory (excluding Antarctic territories), calculated with a radiative transfer model and satellite data, with hourly data from 2004 until 2016 at 90 meters spatial resolution.

When will Cerro Dominador solar thermal plant open?

Construction of the photovoltaic plant commenced in January 2015 and the plant began operating in June 2016 with 160 MW of panels, the largest solar plant in Chile at the time. By the end of 2020 the project was fully erected under the name Cerro Dominador Solar Thermal Plant and is expected to fully operate in 2021.
