Who is Wickes solar powered by solar fast?

Introducing Wickes Solar powered by Solar Fast, a market-leading solar panel installer that has helped thousands of homes across the UK on their solar energy journey.

Why should you choose Wickes solar?

With a mission to help property owners save money, reduce their carbon footprint and reap the rewards of reliable energy, Wickes Solar is here to bring you quality solar panel installations at competitive prices.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

Appointment. Before you book an appointment with a sales representative, it's important to make sure you know exactly what questions to ask. Wickes Solar works with Solar Fast's well-trained reps who know everything there is to know about the solar installation process and can give you information on costs, savings, and what will be best for you and your home.

Portable solar power panels and accessories are ideal for those who need easy access to power while travelling or in remote areas. Whether you're camping, travelling or preparing for emergencies, these compact and foldable solar panels provide convenient power solutions for charging and running small devices when paired with an inverter and storage.

Here are 5 ways for you to get the most out of your solar panels: Keep your solar panels out of the shade. Even though solar panels are clever enough to create energy without being in direct sunlight, more sunlight means more electricity. Be mindful of trees that grow or any objects that could block your solar panels light source.

At Wickes Solar powered by Solar Fast, our warranty covers your panels for 30 years, but they can last for over 40. The biggest risk to solar panels come from damage or degradation. In the UK, we expect solar panels to have a medium degradation rate of 0.5% per year, so you've got a while before any problems will arise.

These figures are based on Type 1, 108 Half Cell Monocrystalline panels operating at 3.85 Watts. While we can't give you a quick and easy answer to the number of panels you'll need in this article, keep reading to get an estimate.
