

Does China's Southern Power Grid have a digital power network?

“China Southern Power Grid also has two major pilot projects on power trading in Guangdong and Yunnan provinces, which provide both challenges and opportunities for the country's in-depth digitalization of its power networks,” he added.

Why is China's power grid creaking?

China's creaking grid represents a major constraint to progress on its green energy transition. During the first four months of this year alone, China invested Rmb122.9bn (\$17bn) in its power grid projects, a 24.9 per cent year-on-year increase.

Will a boom in energy storage solve China's supply-demand mismatch?

A boom in energy storage, mostly through large battery packs for grid-level storage, should also alleviate the supply-demand mismatch on China's grid over the long term. Goldman Sachs analysts have forecast a 70-fold increase in battery storage in 2030 from 2021 levels.

(Yicai) June 18 -- China should speed up the construction of new power systems and the electricity grid to soak up surging installed renewables capacity, Zhang Zhigang, the chairman ...
