

# Chint Electric s photovoltaic inverter

Why should you choose Chint power for a photovoltaic inverter & energy storage converter?

Look at the development with data and prove the strength with performance. Chint power is committed to providing photovoltaic inverter and energy storage converter with excellent performance.

How do I Turn on a power inverter?

Manual Turn ON/OFF: Manual Power ON/OFF is required after Grid Code setting or manual (fault) shut-down. Touch to submenu "Turn ON/OFF". Then move the cursor to "Turn ON" to start the inverter, the inverter will start up and operate normally if the start-up condition is met. Otherwise, the inverter will go to stand-by mode.

How do I fix a faulty PV inverter?

Correct PV string connection. Contact after-sales service personnel. Restart inverter by recycle both AC and DC switches. Wait for 1 minute between OFF and ON for all energy to discharge. Contact after-sales service personnel. Restart inverter by recycle both AC and DC switches. Wait for 1 minute between OFF and ON for all energy to discharge.

What if inverter can't clear fault?

If inverter cannot clear fault, replace inverter. Restart inverter by recycle both AC and DC switches. Wait for 1 minute between OFF and ON for all energy to discharge. If inverter cannot clear fault, replace inverter. Restart inverter by recycle both AC and DC switches. Wait for 1 minute between OFF and ON for all energy to discharge.

How many fuses does a PV inverter have?

The inverter is equipped with 20ADC fuses. Customers must verify that the appropriate fuses are installed depending on the actual configuration of PV strings. Each MPPT DC input from the PV that has more than 2 strings requires fuse protection. For MPPT DC input with 2 strings or less no DC fuse protection is required.

How do I know if my inverter is in reverse polarity?

Use meter to find out which PV string is connected in reverse polarity. Correct PV string connection. Contact after-sales service personnel. Restart inverter by recycle both AC and DC switches. Wait for 1 minute between OFF and ON for all energy to discharge. Contact after-sales service personnel.
