What is a Moixa smart battery system?

Moixa Smart Battery systems are designed to be installed alongside solar panels to maximise the use of solar energy in the home and lower the owner's energy bills.

Is Moixa a regulated company?

We are authorised and regulated by the Financial Conduct Authority under reference number 767876. Moixa is the UK's leading smart battery company. We develop our Smart Battery hardware and GridShare software to facilitate smart energy storage and sharing.

What is Moixa & how does it work?

Moixa is a British cleantech company that develops software and hardware to optimise use of renewable energy. They produce smart batteries that are paired with residential solar panels.

How does the Moixa hub work?

For homes with regular household habits, the Moixa Hub will generate a personalised battery charging plan aimed at covering your household energy consumption from solar energy and low-cost grid energy.

How many employees does Moixa Energy have?

They have about 70 employees in London. The company originally launched the Moixa Energy brand to produce a NiMH rechargeable battery called USBCell. The batteries included a USB connector to allow recharging using a powered USB port.

Why did Lunar Energy buy Moixa?

Lunar Energy acquires UK-based Moixa in support of ambitious plans to transition homes around the world to 100% clean power. Climate change is a race against the clock. In order to prevent the worst effects of this climate emergency, we now face an... How are countries worldwide tackling the residential flexibility challenge?

Phone and electric car batteries are made with cobalt mined in the Democratic Republic of Congo. Cobalt Red author Siddharth Kara describes the conditions for workers as a "horror show."
