Conrad Energy Limited is a registered company in England and Wales no. 09866059. VAT registration no. GB281421814. Registered office address: Suites D&E Windrush Court, Blacklands Way, Abingdon, OX14 1SY

What is close brothers leasing doing with Conrad energy?

Close Brothers Leasing has added to its energy book through the provision of a £70m facility to Conrad Energy for the development of gas peaking power plants with a combined installed capacity of 180MW.

Could Conrad's 'major Framework Agreement' add consistency to GE's renewables portfolio?

The project, dubbed a "major framework agreement" by Conrad, could help add an element of consistency to GE's growing renewables portfolio, while adding more pieces to Conrad's ambitious plans to develop a battery pipeline with a storage capacity of 500MW.

Could a GE-Conrad project make a difference?

The development of a project on the scale of the GE-Conrad plan, over such a short period of time, and with two of the sector's leading companies, could also help demonstrate that making tangible change to the renewable industry is eminently possible for those with the resources and intent to make a difference.

Image: Harmony Energy. Independent power producer Conrad Energy has secured planning permission for a 15.23MW solar farm in collaboration with Leonardo Helicopters. The solar farm, the operational start date for which has yet to be announced, will join the company's 15MW battery energy storage system (BESS) in the Somerset region.

Conrad Energy expands UK pipeline to 950MW. Larport Solar Farm is the latest in Conrad Energy's growing pipeline of projects. The company already hosts a potential 950MW of energy generation and battery energy ...

Conrad Energy is a leading energy provider and Independent Power Producer, delivering energy to the grid and business customers. Our vision is for a cleaner, greener, more efficient energy future and our mission is to play a key part in the UK's energy transition.

Accumulators. To generate electricity, accumulators use chemical reactions that can occur in both directions. During charging, chemical energy is converted into electrical energy, and during discharging, the process is reversed. Accumulators are designed to be repeatedly discharged and recharged, which is a significant difference compared to regular batteries.

Conrad Energy has gained planning permission for a 50MW two-hour battery energy storage system in North Petherton, Somerset. The site will be the developer's biggest battery energy storage system yet. It is being designed using the local topography to conceal the scheme within the landscape.

As part of the planning process, Conrad Energy is required to demonstrate that there will be a biodiversity gain on site. ... listen to feedback and answer your questions on 21 November at St Michael's Church, Burnett. Proposed design. Project timeline. Summer 2024. Planning submitted - view application . Autumn 2024. Planning decision ...

renewable energy to St Helena under a Power Purchase Agreement (PPA). A contract was signed between Connect and Sustainable Energy 1 Limited, a subsidiary of PASH, in May 2020. However, following a period of negotiation and planning, amidst changing circumstances
