

Container energy storage in no-man's land

How many units can a container hold?

A maximum of ten containers (labelled 0 through 9, although they can be renamed) may be built, with each container holding fifty stacks. Each stack will hold 9999 units of a specific resource, or 20 of certain special items that normally holds 10 per stack like Vortex Cubes. Spacious additional storage for inventory items.

What are storage containers?

Storage Containers are used to provide additional storage in your base. Storage Containers allow a player to store resources and products above and beyond what is available in a starship or exosuit inventory. A maximum of ten containers (labelled 0 through 9, although they can be renamed) may be built, with each container holding fifty stacks.

Where should I build my storage containers?

Build the storage containers at your favourite base, and indeed any other base you work from regularly, no need to power them, just hide them away within range. When you have a freighter build all 10 on there too for fantastically increased functionality.
