

What is Corre Energy's Project Roadmap?

Corre Energy's project roadmap with solutions of hydrogen-fuelled compressed air and hydrogen storage in salt caverns are globally scalable technologies that can offer decarbonisation and accelerate the journey towards net-zero targets. The EU's objective is to reach over 80% renewable energy by 2050.

Where is Corre Energy's flagship CAES project 'ZW1' located?

Corre Energy's flagship CAES project 'ZW1' is strategically located in north-eastern Netherlands. The project has secured co-financing from the Connecting Europe Facility and is an approved Project of Common Interest (PCI).

Does Corre energy have a pipeline?

Corre Energy's roadmap includes several potential projects in the pipeline, initially with two in the Netherlands and two in Denmark, Corre Energy has further underground energy storage projects located across the globe.

How does Corre energy support the transition to net-zero?

To read more: [Cookie Policy](#) Corre Energy is supporting the transition to net-zero by developing and commercialising Long Duration Energy Storage projects and products.

How did Corre energy secure the Ahaus site?

Corre Energy secured the Ahaus site through an agreement with Solvay, a global chemical company, in June 2023. Ahaus is close to the country's future national hydrogen backbone grid, H2-Startnetz, and will support the development of a regional, industrial-scale, renewable green hydrogen value chain.

Does Eneco have a partnership with Corre energy Germany?

LichtBlick, Eneco's German subsidiary and a green energy supplier, will co-develop, finance and operate the Ahaus project with Corre Energy Germany. The agreement significantly reduces the risks for Corre Energy in achieving a commercial close and final investment decision.

Battery energy storage systems (BESS) from several firms helped the energy system recover after the NSL interconnector, which connects the UK and Norway, suddenly stopped exporting power to the UK. Developer in Ireland submits application for Europe's first multi-day iron-air battery project

Compressed air sites on the northern coast of Europe could provide large amounts of storage capacity, Corre Energy believes. Image: Corre Energy. If Europe is to meet its goals on decarbonisation and gaining independence from Russian imports of fossil fuels, it will need energy storage and lots of it. Some have regarded the European Union's ...

Other developers looking to progress projects of similar scale to Westtermoordijk include Lion Storage, which discussed the Dutch market in detail in an interview with Energy-Storage.news last year. Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it is ...

Corre Energy B.V. has expanded its energy storage project development operations into the United States and Canada. Corre Energy US Development Company LLC, a subsidiary of Corre Energy B.V., has been formally launched to source and develop utility-scale compressed air energy storage (CAES) projects across North America.

Dutch energy storage company Corre Energy and Eneco have agreed to co-develop and co-invest in a compressed air energy storage (CAES) project in Germany with 320MW of power-generating capacity. The ...

Energy storage. McKinsey estimates that variable renewable sources are set to make up almost 40% of world electricity in 2040, up from 7% in 2019, and the EU forecasts between 80% and 95% renewable power in the continent by 2050. Europe in 2019, 3.6 GW of offshore wind was installed, bringing the total to 22 GW. Scenarios for wind power for Europe range from 240 to ...

Corre Energy is accelerating this energy transition through underground energy storage by developing, building and operating storage systems in salt caverns, specifically hydrogen-fuelled Compressed Air Energy Storage (CAES), green ...

Corre Energy B.V. has expanded its energy storage project development operations into the United States and Canada. Corre Energy US Development Company LLC, a subsidiary of Corre Energy B.V., has been ...

Announced this morning -- as BEIS innovation programme manager Georgina Morris prepares to join speakers at the Energy Storage Summit 2022 in London today and tomorrow, hosted by our publisher, Solar Media -- a total of 24 projects have now received funding through the Longer Duration Energy Storage Demonstration Programme.. The awards ...

Discussing Corre's ongoing CAES projects, the recent news that could see it de-list from the Euronext exchange and his views on the wider LDES space, Corre CEO Keith McGrane tells Energy-Storage.news that he estimates that more LDES technologies would commercialise in the 10-20-hour duration space than for multi-day.

Corre Energy is a leader in the development and operation of Long Duration Energy Storage (LDES) projects and products, accelerating the transition to net zero and enhancing the security and flexibility of energy systems. Our first storage projects, both Compressed Air Energy Storage schemes, are located in the Netherlands and Denmark and we ...
