

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

How can Kosovo reduce its electricity consumption by 2030?

Investment in energy efficiency: Incremental investment in public and residential buildings, including district heating, could reduce Kosovo's national electricity consumption by about 600 GWh by 2030, according to the World Bank options study.

Which companies are affecting the energy sector in Kosovo?

Besides government institutions, there are also companies with great impact in energy sector such as Kosovo Energy Corporation ( KEK ), Transmission, System and Market Operator ( KOSTT) and Kosovo Electricity Distribution and Supply (KEDS). A lot of legislative documents that aim the adjustment of electricity sector have been approved.

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

Who is cube green energy?

Cube Green Energy is a renewable energy producer and developer leading the transformation of Europe's energy market. We develop and operate wind and solar farms and have a core specialization in repowering existing wind farms, optimizing their performance and maximizing their energy output.

What energy sources can Kosovo use?

There are three main sources of energy Kosovo can potentially use to satisfy this demand--lignite, gas and renewables. Lignite: We no longer see any realistic prospect for external financing of a new lignite power plant in Kosovo.

12 January 2024 - Kosovo\* failed to include all the 2030 Energy Community climate and energy targets and the 2050 climate neutrality objective in its new law. Electricity. Energy Community urges Kosovo\* to commit in its NECP to phasing out coal by 2050.
