Solar systems based on the coupling of parabolic concentrating collectors and thermal engines (i.e. dish-Stirling systems) are among the most efficient generators of solar power currently available.

The Cypriot CAP Plan will provide an opportunity to renew the agricultural potential of Cyprus, creating a robust primary sector. It aims to respond to the concerns of producers and consumers, to attract younger generations, maintain social cohesion and promote a ...

High Pressure Pro Misting Kit - perfect for hotels. To meet the demand of many professional sectors: collective catering (eg, bar, restaurant, hotel, etc.), industrial (eg, cooling a workstation) or agricultural (eg livestock, milking parlor, greenhouse, etc.), these misting kits have been designed to cater for these large areas.

Following Cyprus' recent partnership with US enforcement authorities, K2 Integrity's Olena Morozovska and Alexander Stirling examine the EU member state's recent track record in preventing financial crime. ... The perceptions are also fuelled by the structure of the TRNC's banking system, which operates exclusively through Turkey and ...

The Stirling engine together with a solar concentrator represents a solution for increasing energy efficiency. Thus, within the National Research and Development Institute for Cryogenic and Isotopic Technologies, an automation system was designed and implemented in order to control the processes inside the solar conversion

unit using a programmable logic controller from ...

Dish-Stirling systems have demonstrated the highest efficiency of any solar power generation system by converting nearly 30% of direct-normal incident solar radiation into electricity after accounting for parasitic power losses [1]. These high-performance, solar power systems have been in development for two decades with the primary focus in ...
