We offer micro data center, POD, containerized data center and power container solutions.

Though Microsoft and Google were the earliest adopters of the shipping container data center, the early 2000s saw them widely implemented in military and other defense deployments. Since then, numerous companies have built data centers in shipping containers to secure and organize critical IT infrastructure. Let's take a comprehensive look at ...

One of them, Osmo Koskisto, is a leading data center expert in Finland, who had been involved with finding locations for almost all the data centers in Finland. Viherto found out about it once getting involved with MCF data center and invited Koskisto to become one of the first investors of Estonia's first ever large scale data centers.

The largest and most energy-efficient data centre in the region was opened in Estonia. The opening of the building complex will multiply the data hosting export potential of the region. The building that cost nearly 40 million euros is the first of the three buildings to be built in the same area, all of which will contribute to the development ...
