the options of a third harmonic system (at 1.057GHz) and a fourth harmonic system (at 1.409GHz). The harmonic cavities can be: Passive superconducting cavities: the voltage is in-duced by the beam itself. This requires a minimum of beam current and is suited for multibunch operation, at 200 mA. For few bunch modes, with low total cur-rent ...

and dynamic harmonic interaction between and dc side, ac or ac and ac side. Other power electronic based systems are considered in Chapter 4 in order to analyze the procedure of harmonic transfer, which can be generated from the ac grid and in dc micro grid systems. Furthermore, the diode rectifier is also modeled, where the

A system with a standard VFD will create a certain level of distortion to the AC network. A system's actual THD (Total Harmonic Distortion) will vary depending on other loads, available generator capacity, total generator capacity, etc. Sleipner systems with a low harmonic VFD will reduce the harmonic distortion to less than 5%, which will give ...
