German 17 cm coastal battery. The battery was the first permanent fortification that the Germans established at Hanstholm. Already during the night of 9 April 1940 - the day of the German occupation of Denmark - the German navy planted sea mines in the Skagerrak to block the access for Allied ships to the Kattegat and the Baltic.

The battery charges from the mains, and with a newly developed software, the battery digitally synchronizes with specific Vestas wind turbines, thus ensuring that it only charges when the wind...
