Are LG Energy Solution & Hyundai Motor Group making EV batteries?

SEOUL, May 26, 2023 - LG Energy Solution (LGES) and Hyundai Motor Group announced an EV battery cell manufacturing joint venture in the U.S. today. LGES and Hyundai Motor Group signed a memorandum of understanding to produce EV batteries in the U.S. and further accelerate the Group's electrification efforts in North America.

Where are LG batteries made?

The complex consists of two manufacturing facilities which are the company's first stand-alone cylindrical and ESS battery plants in North America. The cylindrical battery plant, called LG Energy Solution Arizona, will produce 46-Series batteries for electric vehicles (EV).

Will lges produce a 4680 battery?

LGES has been operating a pilot production line for 4680 battery cells to ensure they meet Tesla's requirements. The company's two main domestic competitors, SK On Company and Samsung SDI Company, and Japan's Panasonic also plan to produce similar batteries in the near future.

Where are lges batteries made?

LGES' CEO Kim Dong-myung told reporters: "We plan to begin mass production of 4680 batteries at our Ochang plant in South Korea by September," adding that his company is also in talks to supply these batteries to other vehicle manufacturers in addition to Tesla.

Will lges be able to produce lithium iron phosphate batteries in 2025?

The company's two main domestic competitors, SK On Company and Samsung SDI Company, and Japan's Panasonic also plan to produce similar batteries in the near future. Mr Kim also confirmed LGES will begin production of lithium iron phosphate (LFP) batteries in the second half of 2025, initially to meet demand from Chinese clients.

How does Hyundai Mobis assemble EV batteries?

Hyundai Mobis will assemble battery packs using cells from the plant, then supply them to the Group's U.S. manufacturing facilities for production of Hyundai, Kia and Genesis EV models. The new facility will help create a stable supply of batteries in the region and allow the Group to respond fast to the soaring EV demand in the U.S. market.
