

# Do all Sanjing photovoltaic inverters have wifi

Are Saj solar inverters reliable?

SAJ inverters have been awarded the Top 10 solar inverter brand in China for five consecutive years, and also becomes global Top 10 residential inverter in 2018. SAJ's R5-10K-T2 and Suntrio Plus 33K inverters achieved All Quality Matters Award by TUV Rheinland, which proves high quality and reliability of SAJ solar inverters.

Is Saj liable if a solar inverter is lost?

SAJ is not responsible for the loss and these warranty claims. The SAJ inverter must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. and persons. The solar inverter will become hot during operation. Please do not touch the heat sink or peripheral surface during or shortly after operation.

Can a saj inverter be operated with a PV generator?

The SAJ inverter must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. and persons. The solar inverter will become hot during operation. Please do not touch the heat sink or peripheral surface during or shortly after operation. Risk of damage due to improper modifications.

How to connect a solar inverter to a PV array?

The PV array is properly insulated to ground before it is connected to the inverter. Select cables according to the below specification. For details, refer to the inverter user manual. The positive cable is connected to the positive side of the solar panels, and the negative cable is connected to the negative side of the solar panels.

Why is my solar inverter NOT working?

Shutting Down the Inverter The solar light intensity is insufficient during sunrise and sunset or when the output voltage of the photovoltaic system is lower than the minimum input power threshold of the inverter. The battery is neither importing nor exporting the electricity from or to the inverter.

Can a saj inverter be wet?

Do not touch the surface of the inverter while the housing is wet, otherwise, it might cause electrical shock. Before opening the housing, the SAJ inverter must be disconnected from the grid and PV generator; you must wait for at least five minutes to let the energy storage capacitors completely discharged after disconnecting from power source.
