

Drax power Puerto Rico

What is Drax Power Station?

Drax Power Station, Drax, Selby YO8 8PH At Drax Power Station you can see every part of how electricity generation is done and find out how we're upgrading to the latest biomass technology.

How many boilers does Drax have?

To do this, Drax operates on a massive scale. We've got six boilers, each as high as a 15-storey office block, a main chimney taller than the London Eye, and over 1,800 miles of steel tubing, enough to stretch from John O'Groats to Land's End and back again. It's a site built on superlatives and on a tour at Drax you can see it all first-hand.

Why did Puerto Rico get a power outage?

The announcement comes as the U.S. territory continues to struggle with chronic power outages that have worsened since Hurricane Maria pummeled the island as a powerful Category 4 storm in 2017, razing the electric grid. The outages also are blamed on a lack of maintenance and investment in its electric grid for decades.

Renewable energy leader Drax is to invest £80 million in a major refurbishment of its iconic "Hollow Mountain" Cruachan pumped storage hydro power station in Scotland, increasing its capacity and supporting UK energy security.

Bought by Drax in December 2018, the site is one of only four pumped storage hydro stations in the UK and has a capacity of 440 MW - enough to power more than 90,000 homes. Pumped storage is one of the oldest forms of large-scale energy storage requiring two reservoirs based at different altitudes but close to each other.

Drax Power Station has a long, proud history of playing a central role in producing the UK's electricity. It is already the home of the largest decarbonisation project in Europe and is now the site of innovation for bioenergy with carbon capture and storage (BECCS), a negative emissions technology essential for fighting the climate crisis.. The site near Selby in North Yorkshire ...

Steve Marshall, Drax's Development Manager, said: "A new generation of pumped storage hydro plants will strengthen the UK's energy security by enabling more homegrown renewable electricity to come online to power homes and businesses across the country. Drax's plan to build a new plant at Cruachan will support hundreds of jobs and ...
