

# Dual sun solar panels The Netherlands

What is a dualsun solar panel?

DualSun aims to reduce the energy consumption of buildings by producing solar heat and electricity. Briefly, the DualSun solar panel is an advanced hybrid solar(PV-T) technology that produces simultaneously electricity (photovoltaic) and hot water (solar thermal).

Where are dualsun solar panels made?

Designed in France Dualsun's R&D center is based in Marseille, France and our engineers innovate continuously to reduce the environmental impact of our solar panels. Your solar project from A to Z Dualsun is more than a solar panel manufacturer. With our online services, we guide our clients and partners from design to installation and beyond.

Are dualsun solar panels low-carbon?

Dualsun presents a complete range of photovoltaic panels, with each model adapted to a specific project type. Dualsun offers a range of solar panels 100% low-carbon, with a firm commitment to sustainability, recyclability and low-carbon energy. Dualsun SPRING produces electricity at the front and hot water at the back, doubling the solar output.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.

Can you install solar panels in a Dutch home?

Contemporary Dutch homes, with their expansive roofs and minimalist design, offer a wonderful canvas for solar installations. These homes often allow for a more extensive array of panels, maximizing energy capture. The goal is not just to add solar panels but to integrate them in a way that complements the beauty of Dutch architecture.

Why should you choose a dualsun solar panel?

The DualSun panels are very well positioned into the PV market thanks to its compatibility with all the PV standards: a huge market growing fast ! The DualSun panel is the first in the world to pass a new series of tests specific to solar PV/T technologies.

The closed-circuit configuration integrates a heat exchanger to heat the pool. This configuration is adapted for combining domestic hot water heating and pool heating using the same solar installation.

combining domestic hot water heating and pool heating using the same solar ...

Panel solar diseñado en Provenza La I+D y el diseño de nuestros paneles tienen lugar en nuestro centro de investigación de Marsella, en Provenza. Nuestros ingenieros innovan cada día para desarrollar paneles solares cada vez más ...

Key takeaways. Solar tracking systems allow solar panels to follow the sun's path in the sky to produce more solar electricity. While solar trackers will increase the solar panel system's energy production, they are very expensive and can potentially double the cost of installing solar panels.

Regular maintenance ensures solar panels' longevity and optimal performance. Dutch communities are proactive in adopting solar energy, offering a supportive network for newcomers. Embracing solar energy in the ...

Pannello solare progettato in Provenza La ricerca e lo sviluppo dei nostri pannelli hanno luogo nel nostro centro di ricerca di Marsiglia, in Provenza. I nostri ingegneri innovano ogni giorno per sviluppare pannelli solari sempre più rispettosi dell'ambiente.

FLASH - Our photovoltaic range Active references Previous references Here-below you will find the list of previous references of Dualsun panels and the associated technical files. For further information, please contact us. SPRING - Our hybrid range SPRING4 SPRING3 SPRING coupling Previous references Warranties & Conditions Terms & Conditions, Warranties and ...

In addition to a fixed tilt, two types of solar panel exist that can track the sun: single-axis trackers follow the sun over the course of a day, typically tilting from east to west and dual-axis ...

The Netherlands is carving out a reputation as a frontrunner in adopting renewable energy, particularly solar power. While the thought of diving into a new technological venture in a foreign land might seem daunting, especially with potential language barriers, understanding and installing solar panels in the Netherlands can be rewarding and ...

Significant savings Save up to 90% on your overall energy bill (including hot water, electricity and heating) from the first year of installation.; High performance The system energetical performance is on average 1.2 times higher than a traditional air-to-water heat pump heating solution.; A sustainable system A solar-thermal heat pump is a sustainable system, avoiding 6 tonnes of ...

Following the sun. Thanks to the Floating Solar rotation system, the panels follow the sun, generating 30 percent more power than traditional PV installations. "We will soon be the largest floating solar park in the Netherlands and the largest sun-following park in the world," says Arnoud van Druten of Floating Solar.

In 2013, Dualsun was the first company to successfully pass the new series of tests specific to solar hybrid
