

Eaton solar battery Armenia

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

Why do Armenians use solar energy?

The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m² annually. One of the well-known utilization examples is the American University of Armenia (AUA) which uses it not only for electricity generation, but also for water heating. The Government of Armenia is promoting utilization of solar energy.

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour(kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

How does Eaton use my data?

I understand and agree that Eaton will use my data to personalize marketing communications. Any use of my personal data will take place in compliance with the relevant and applicable data privacy laws and the Eaton Privacy Policy. I can withdraw my consent to receive marketing communications at any time by contacting Eaton.

Infographic: Smart, safe solar power Eaton's mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic, and mechanical power - more safely, more efficiently, and more reliably.

Energizing clean, affordable solar power. As we move toward a clean energy future, investment in new technology, changes in regulations, the complexities of grid connectivity and grid security challenge solar energy adoption. See how we are helping make solar power a reality in utility, commercial and residential applications.

Learn about solar energy, inverters, PV efficiency, microgrids with DC power and energy storage. Santino Graziani and John Vernacchia explain how Eaton can help you with renewable applications at our Power Systems Experience Center.

Eaton announces the launch of the solar power center loadcenters and meter breakers. These units combine both utility power and solar photovoltaic (PV) power into one enclosure and can be applied as a component of a complete PV electrical system. Eaton offers the most complete line of Balance of System (BOS) products in the industry.

Eaton offers a suite of supercapacitor modules ideal for integration into power quality equipment, such as uninterruptible power supplies (UPS) and similar voltage sag ride-through equipment. Due to supercapacitors storing charge electrostatically, they offer ultra-fast response times, high efficiency and inherent reliability; all of which are ...
