

Ecos energy Cuba

What is the energy source in Cuba?

[español]o [português]Oil and natural gas provide roughly 80% of Cuba's total energy supply, with biofuels and waste accounting for most of the remaining 20%. In 2020, 95.1% of electricity generated in Cuba came from non renewable resources and the remaining 4.9% from renewable sources (3% biomass, 0.8% solar, 0.6% hydro, and 0.5% wind).

How can Cuba build a more resilient energy system?

Building a Cleaner, More Resilient Energy System in Cuba recommends numerous ways by which domestic policy in Cuba can prioritize working towards a more sustainable, resilient grid -- especially by investing in the energy transition-- and ways in which international cooperation can support these goals.

What are the major energy companies in Cuba?

UNE (Unión Eléctrica) is responsible for the generation, transmission, distribution, and commercialization of electrical energy. CUPET (Unión Cuba-Petróleo) is the state-owned oil firm and Cuba's largest oil company. Other companies operating in Cuba's energy sector include Energas, Inter RAO, Zerus, Havana Energy, and Siemens.

Why is the energy sector at a crossroads in Cuba?

Cuba's energy sector is at a crossroads. The country's mostly fossil fuel-fired energy system faces a number of longstanding and serious challenges, including breakdowns at aging power plants, decreasing fuel imports and fuel shortages, and the growing threat of climate change-related disruptions.

How will Cuba's relationship with other countries impact the energy transition?

Cuba's relationships with other countries will be key to realizing the energy transition. Since 2000, Venezuela has been Cuba's primary source of imported oil. However, political and economic troubles in Venezuela caused oil exports to Cuba to fall by about half, resulting in Cuba increasingly seeking oil imports from Mexico and Russia.
