

Ecostar energy Marshall Islands

What does the Marshalls Energy Company do?

"The Marshalls Energy Company is a semi-autonomous utility company responsible for the generation, distribution and sale of electricity on a number of islands and atolls within the Republic of the Marshall Islands."

What is Island Eco?

Island Eco is a social entrepreneurship that has been doing business and implementing projects in rural electrification and renewable energy in the Marshall Islands since 2001. Income levels are low and communities are extremely remote, with small populations, long distances between each atoll, and unreliable transportation.

How many kWp solar systems are in the Marshall Islands?

Two 53 kWp and 57 kWp systems are at the College of the Marshall Islands. The others are a 10 kWp system at the fisheries base, a 30 kWp system at the University of the South Pacific campus and a 209 kWp system at Majuro hospital. MEC intends to move cautiously before allowing a major expansion of grid-connected solar generation.

What are the main sources of energy in the Marshall Islands?

MEC, KAJUR, the College of the Marshall Islands and the University of the South Pacific, all carry out capacity building in support of energy activities. Most of the primary energy supply (90%) comes from petroleum, with biomass used for cooking accounting for nearly all the rest.

What does the 2009 National Energy Policy mean for the Marshall Islands?

This led to the endorsement of the 2009 National Energy Policy, along with the Energy Action Plan, which aims for "an improved quality of life for the people of the Marshall Islands through clean, reliable, affordable, accessible, environmentally appropriate and sustainable energy services."

How can MEC and the College of the Marshall Islands work together?

The College of the Marshall Islands, the MRD Energy Planning Division and MEC need to work together to develop courses that be sustained in the long term. They would train local people to install and maintain the types of renewable energy equipment being used in the RMI. Existing technical training is in English only.
