

Elexsys energy Sudan

What is elexsys technology?

The world-leading eleXsys technology unleashes the full potential of locally generated renewable energy by solving major voltage problems. It allows clean energy generation such as commercial rooftop solar to feed multiple times more energy back into existing grids without the need for expensive infrastructure and equipment upgrades.

What is elexsys energy?

eleXsysEnergy is the developer and manufacturer of the eleXsys technology, an innovative and award-winning solution to voltage issues that can be created by clean energy producers - such as solar energy systems - trying to send energy back to electricity grids that were designed to send, not receive, energy.

Is elexsys a good company?

Elexsys' technology has also won a number of local and international accolades, including in 2021 the Award for Energy & Renewables at InnovationAus' inaugural Awards for Excellence and first prize in the Renewable Energy Category at the 2021 Davos Energy Week Awards.

How much does electricity cost in Sudan?

As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt. In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector.

Where is elexsys energy located?

eleXsys Energy established offices in the USA, Europe and the Asia Pacific, and new partnerships to enable rapid global expansion. An international investment banking and financial services company was engaged to assist with capital raising and more award wins were achieved.

What are the challenges facing Sudan's energy sector?

Sudan's energy sector is facing numerous challenges: persistent blackouts, an inadequate energy infrastructure, and a poor and scattered government response.

The IKEA eleXsys Microgrid is combining commercial-scale rooftop solar and batteries with eleXsys technology to create a new model for renewable energy systems. In November 2021, the Australian Government announced financial support of \$3.5 million to assist in building eleXsys Energy's first dedicated Australian manufacturing facility.

eleXsys Energy CEO and Co-Founder Dr Bevan Holcombe said the Earthshot Prize nomination ranked among the company's biggest achievements to date. "The first year of the prize included many outstanding organisations from around the world offering the type of vital contributions we need to change the course of our planet's future," he said.

Sudan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
