

# Enercon europe Tuvalu

Why should you partner with Enercon Technologies Ltd?

Partner with Enercon Technologies Ltd and gain direct access to our experienced engineers to develop a power conversion solution, power management solution or networking solution tailored to your specific project.

Where is Enercon based?

ENERCON began its activities in the Western Europe region in 1992 and has seen continuous growth since then. The region consists of six countries - United Kingdom, Ireland, France, Belgium, the Netherlands and Luxembourg. The team is made up of dynamic professionals from various backgrounds, committed to working together on the energy transition.

Where are Enercon wind turbines made?

With ENERCON, you can rely on: At its production sites in Germany, Poland, Portugal and Turkey, ENERCON manufactures the machine house, generator, hub and rotor blade components that go into our wind turbines. We also collaborate with partners in China, India and Turkey on manufacturing rotor blades and generators.

Who is Enercon Western Europe?

ENERCON Western Europe | 23,142 followers on LinkedIn. Energy for the World | As a pioneer of wind energy technology and a partner of the energy transition, ENERCON specialises in the turbine and technology development, production, sales and servicing of onshore wind energy converters.

What applications does Enercon technologies support?

Enercon Technologies Ltd has extensive experience supporting a wide variety of military applications, including avionics, UAV's, aircraft, C4ISR, electronic warfare, ground vehicles, radar arrays, missiles and anti-missile defense, surface ships, submarines and more. Examples of applications Enercon Technologies' has supported include:

What is Enercon & how does it work?

Pursuing its mission of 'Energy for the world', ENERCON has driven sustainable energy generation from onshore winds since 1984. ENERCON began its activities in the Western Europe region in 1992 and has seen continuous growth since then. The region consists of six countries - United Kingdom, Ireland, France, Belgium, the Netherlands and Luxembourg.

Our small, rugged USB 2/3 hubs and storage devices enable connectivity and communication between multiple USB devices in weight and space-constrained environments. Every product is designed to withstand the environmental requirements of battlefield deployments, meeting military standards such as: MIL-STD-461, MIL-STD-810, IP67/68.

Darüber hinaus arbeiten wir bei der Fertigung von Rotorblättern und Generatoren mit Partnern in

China, Indien und in der Türkei zusammen. Die zum ENERCON-Kernkonzern gehörenden Produktions-Gesellschaften Mechanic Anlagenbau in Aurich (DE) sowie Windgeneratorenfertigung Magdeburg (DE) bilden dabei die Basis. Als ENERCON ...

The MILTECH 910-PoE is a rugged Power over Ethernet (PoE) switch that supports 60W of PoE on all 8 Gigabit Ethernet 10/100/1000 ports. It supports both 802.3af and 802.3at standard devices for PoE-enabled cameras, Wi-Fi access points, tactical IP phones, mesh nodes and other devices. The MILTECH 910-PoE is fully managed with advanced network features such as ...

Military grade rugged DC to AC power supplies with input of 28Vdc. Output voltage range comes in 115VAC @1A, 115VAC @3A. Output power 100VA/400Hz and 350VA/50/60/400Hz. EMI Filters Included. Designed to meet military standards such as MIL-STD-704 | MIL-STD-1399 | MIL-STD-810 | MIL-STD-461 | MIL-STD-1275 for military applications.

The M167 AC to DC power supply is a Three Phase Input, Single Output, high efficiency, high density, military grade ruggedized AC to DC converter capable of up to 1600W output power. Features include; high efficiency, low noise, internal EMI filters and can support parallel operation for higher power applications. The 115AC input range is 103 - 127VAC Line to Neutral, 400Hz.

The MILTECH 9126 supports 24 x 1G copper ports and 2 x SGMII interfaces for direct connection to 2 x 1G Fiber ports. Designed for complex traffic applications featuring IEEE-1588 capabilities and Synchronous Ethernet (SyncE). With ...

Make energy generation from onshore wind a successful business. As one of the leading manufacturers and service providers for wind turbines, we are a reliable partner for wind farm projects in Europe and worldwide.

Enercon Technologies Europe AG Military-Grade power and networking solutions ITAR & CE. We offer Mil-Grade AC DC, DC DC power supplies, VPX Vita 62, UPS, rugged switches, routers, USB HUBS, media converters and custom solutions for military applications. Our power and communication solutions designed for harsh environments and meet military standards such ...

M9547 series is a 16-channel power distribution unit, designed for airborne and ground applications. It distributes 28VDC through overload and short-circuit protected switches. The M9547 series supports Ethernet communication to control, configure and ...

The M9538 is a 100A eight channel power distribution unit, PDU. Each channel of the PDU contains a solid state circuit breaker that is fully programmable for trip current limits, on/off control, channel sequencing, BIT, voltage and current telemetry. The M9538 input range is nominally 28V but can support between 6 to 33V and is designed to meet MIL-STD-1275, MIL-STD-461 and ...

M4054 is a military grade 3U VPX, 28V DC-DC, SOSA(TM)-aligned PSU card that provides 12V and

3.3VAUX per VITA 62 that is rated at 768W output power. Features include: conduction cooling, 1&quot; pitch, current-sharing, fast initialization, reverse battery protection, internal EMI filters, VITA 46.11 system management. DC input range is 18-50V per MIL-STD-704 and DO-160, but ...

The MILTECH 320G3UVPX is a 3U VPX Ethernet Switch with fully implemented IPMI management complies with the new VITA 46.11 Tier II. This VPX networking module Ports Slot Profiles per SOSA: 1) SLT3SWH2F24U14.4.3 24 x 10GKR + 2 x 40GKR 2) SLT3SWH6F1U7U14.4.14 SLT3SWH6F7U13.4.15 6 x 40GKR + 7/8 x 10GKR Supporting ...

Compact MILTECH rugged routers offer up to 10G transmission speeds for both fiber and copper ports. In addition to L3 routing, each product supports L2 functions including virtual LANS (VLANS), traffic prioritization/QoS, IPv4/IPv6 support, and bandwidth aggregation, latest networking protocols for redundancy, security, multicast, and management. Their size, weight, ...

Military grade rugged AC to DC power supplies with single phase and three phase options. Wide rang of VAC input. Up to 5 outputs with voltage range of 5V, 12V, 15V, 24V, 28V, 48V and custom ranges. Wide range of output power including: 130W, 200W, 300W, 500W, 1000W, 2000W and up to 3600W output power. Designed to meet military standards such as MIL-STD-704 | MIL ...

The MILTECH24FO is a small MIL-STD, fully managed military grade network switch with 24 1Gb fiber optic ports. It can be remotely managed to optimize communications and prioritize critical information traffic. Advanced network feature, include switching protocols, virtual LANS (VLANS), traffic prioritization (QoS), and bandwidth aggregation are standard.

M362 is a rugged high performance 2.5KW/3KVA, 3U rackmount with recessed I/O connectors UPS. Fully compliant with MIL-STD 1399, the M362 serves in Cooperative Engagement Capability (CEC) airborne/naval radar systems, combine multiple sensors to deliver enhanced performance to deal with long ranges threats. It accepts 115/230VAC Input, distributes 115VAC and can ...
