What is the energy sector in Brazil?

The Brazilian energy sector comprises a wholesale market composed of the regulated electricity market (ACR) and the free electricity market (ACL). The ACR is composed of utilities and captive consumers. 2 It is fully regulated by the Brazilian Electricity Regulatory Agency (ANEEL) and the energy is contracted through auctions.

Which energy sources are in Brazil?

The RES will make up 86.6% of the total electrical energy source (EPE, 2020b). The segment is led by hydroelectric energy (58.6%), followed by wind (16.3%), biomass (7.6%), and centralized photovoltaic (4.1%), as highlighted in the Brazilian Ten-Year Energy Expansion Plan 2030 (EPE, 2020b).

What is the future of Brazil's energy policy?

Considering the Brazilian energy policy's future, the perspective of a more decentralized energy system must be accounted for in the face of technological, business, and energy matrix changes. Therefore, the prosumer's figure combined with new Business Models (BM) brings opportunities and challenges for the sector.

Can P2P energy trading be used in Brazil?

However, some recent works have studied the applicability of P2P energy trading in the Brazilian context (Barbosa et al., 2020; Xavier et al., 2015). This BM can help, in the future, to develop a more decentralized energy market in Brazil.
