Cambodia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Economic growth in Cambodia is constrained by a lack of appropriate policy for electricity access and energy security. Only 50 per cent of Cambodia's population had electricity access in 2016. Remarkably, by 2019, the number of households connected to grid electricity grew to almost 80 per cent. The challenge, however, remains for rural areas where certain remote [...]

Sunflower Energy (Cambodia) Co. to establish a factory to produce and assemble solar panels, located in Kdan Roy village, Damnak Ampil commune, Ang Snoul district, Kandal province with an investment capital of ...

Now with an expanding workforce of over 50 staff and a dedication to sustainable energy, K-Box Solution Co. Ltd., is delivering a variety of engineering projects including the first ram-pump project in Cambodia, replacing diesel water pumps with hydraulic ram pumps that use zero fossil fuel and produce zero emissions.
