Eindhoven also has a large number of Energy companies: 547. These three provinces combined have an 46% market share in the total Dutch Energy industry. 1.

How do I find a reliable energy supplier in the Netherlands?

Finding a supplier may be difficult because of the language barrier. Energievergelijk is an independent organisation that can help expats with advice and answers regarding the Dutch energy market. The Netherlands has around 60 energy suppliers that each offer different energy contracts and conditions.

How to find a good energy contract in the Netherlands?

You can use an energy comparison website to find solid and affordable contract. Several energy suppliers in The Netherlands offer their customers the possibility to choose for renewable (green) energy. However, it is important to state that not all electricity is produced using renewable energy sources in The Netherlands.

Do I need a gas & electricity contract in the Netherlands?

When moving to The Netherlands your new home will most likely have a working electricity and gas connection. However, you are obliged to apply for a gas and electricity contract and find a suitable utility company, also called 'energy supplier'. Finding a supplier may be difficult because of the language barrier.

Totally not linked to an energy provider, but if you have a smart meter (slimme meter) you can most likely use the HomeWizard P1 reader. This little dongle is connected to the smart meter and you use an app to read the actual electricity and gas consumption.

In our previous article "The Impact of the Energy Transition for your Business", we discussed the Dutch political landscape, the energy transition, the need for a transition, and the challenges caused by grid congestion. As a reminder, grid congestion occurs when more electricity needs to be transmitted than the grid
