

Fiji's energy services sector faces challenges unique to the nation's geography, namely, providing energy across over 100 populated islands, the scale-related challenges of our small energy market, and an extreme susceptibility to external shocks in managing the evolution of Fiji's energy sector to serve energy supply.

Fiji: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

JCM and Energy Service Agreement Solutions Renewable Energy and Overseas Business Department Komaihaltec Inc. According to the world energy transition outlook, investments across energy transition technologies hit \$1.8 trillion in 2023, up 17% on the previous year and a new record. However, fossil fuel remains the leading basis for energy.

The access to electricity in Fijian households is not 100%. From the last 3 consecutive censuses data, in 1986, 1996 and 2007, 48%, 67% and 89% of households have access to electricity [9]. Electricity is provided by FEA (grid-connected) or distributed generators such as solar home systems or diesel generators or biofuel generators or microhydro schemes.
