What is a lithium energy storage system?

Lithium Energy Storage System. It is a high-quality, hybrid inverter and energy storage unit that can be expandable. It comes with a standard 10 year warranty and can be upgraded to a 25 year warranty. To activate the warranty, fill out all the information below and return it to Lion Energy.

What type of inverter/charger does the energy storage system use?

The Energy Storage System uses a MultiPlus or Quattro bidirectional inverter/charger as its main component. Note that ESS can only be installed on VE.Bus model Multis and Quattros which feature the 2nd generation microprocessor (26 or 27). All new VE.Bus Inverter/Chargers currently shipping have 2nd generation chips.

What makes TE a good inverter & combiner box?

TE supports next-generation inverters and combiner boxes with high-quality, reliable components that help save space without sacrificing power, including power and control connections (terminal blocks, crimp terminals), protections (modular fuse holders), identification and labeling, wire and cable management solutions.

How do I use ESS battery life?

Connect to AC when available, keep batteries charged: Use ESS Assistant and select the "Keep batteries charged" mode. o Not available in the ESS System yet, but it will be implemented. The ESS Battery Life feature will make sure that the batteries are not unnecessarily cycled around a low SoC.

How do I prevent a solar charger from feeding energy to the grid?

Policy 4: Prevent feeding energy to the grid: There are two options here; first - use ESS, but do not enable Solar charger excess feed-in and it will always be connected to the grid. Or, use the Virtual Switch with ignore AC-Input. Policy 5: Connected to mains, no feedback: Use ESS, select the "Keep batteries charged" mode.
