How do I connect my energy storage system?

Install your energy storage systems quickly, safely, and cost-effectively for applications up to 1,500 V - with pluggable battery connections via busbar connection or via battery pole connector. Benefit from the advantages of both connection technologies for front or rear connection.

What is SS1 12mm Energy Storage Connector?

SS1 12mm energy storage connector, mainly including 250A, 300A, 350A/400A series. It has functions such as key position error prevention, positive and negative color error prevention, 360° rotation, etc., corresponding to high-voltage cables of 70mm, 95mm, and 120mm.

How to connect a busbar to an energy storage system?

Connectors for connecting to the busbar simplify the installation of slide-in systems in energy storage systems. The connectors with reverse-polarity protection are plugged onto the rear side of a storage system and are suitable for system voltages up to 1,500 V.

Why should you use DC connectors for home storage applications?

The new connectors for home storage applications are especially suitable for use on battery inverters. DC connectors protected against polarity reversal prevent mismatching in common PV connection technology and battery-pole short-circuits. Energy storage systems enable the self-consumption of renewable energy regardless of when it is generated.
