Utilitas Wind, part of Estonian renewable power and heat producer Utilitas, sold the development to

Latvenergo for an undisclosed price. The wind farm, named Telsiai, will be situated in the namesake county in Lithuania. Denmark's Vestas Wind Systems A/S will supply and install 20 units of its 6.2-MW wind turbines for this project. Latvenergo ...

The total installed capacity of green energy in Lithuania would reach 7 GW, of which 1.4 GW would be generated by offshore wind, 3.6 GW by onshore wind and 2 GW by solar power plants. With such ambitious plans, Lithuania needed to speed up the implementation cycle of renewable energy projects, which had been unreasonably long due to ...

scenarios for generation, energy storage, and transmission are based on long -term plans and ... Wind and solar resources are well paired in Lithuania. The mix of solar and wind resources, in ... o Lithuania's power system was modeled based on the 2018 weather year while the rest of Europe was modeled based on the

At the end of June 2024, the Nordex Group signed a contract with the E energija group for the supply and installation of six N163/6.X wind turbines for a 42 MW wind farm in Lithuania. The order also includes a Premium-Plus service contract for the maintenance of the turbines over 35 years.

Lithuania's National Energy Regulatory Council (NERC) has launched its second offshore wind tender, seeking a developer for a 700 MW offshore wind farm, with the potential winner expected to be announced by 2 May 2025.

Estonia's Eesti Energia on Friday announced a final investment decision on the 75-MW Akmene wind project in Lithuania. The Akmene wind park, developed by Eesti Energia's 100% subsidiary Enefit Green AS, is expected to be commissioned by the end of 2023.

In June 2020, Lithuania picked a specific area, located about 29 km from shore and covering 137.5 sq km in average water depths of 35 m, saying it was appropriate for the construction of a 700-MW wind power complex. Developers for the site will be chosen in a tender, planned to be held in 2023.

UAB Renerga, a leading developer of wind energy projects in Lithuania and a company of the Achema Group, contracted the Nordex Group to supply 40 N163/6.X turbines. The Delta4000 series turbines are projected for the 264 MW Pagegiai wind farm project in the west of the country. The contract also includes a Premium Service contract.
