For businesses that can't afford to lose power, our Industrial offerings are designed for mission-critical power including factories, data centers, hospitals, and municipalities.

What will happen to Japan's energy supply in the Middle East?

Japan depends on the Middle East for about 90% of its crude oil requirements. It also largely relies on imports of LNG and coal from Asia and Oceania. If anything happens in these regions, a stable supply of energy for Japan will be jeopardized.

What is the energy sector like in Southeast Asia?

Today, energy-intensive industries in Southeast Asia predominantly rely on coal - making up 44% of their energy demand - to meet the sector's high-temperature heat requirements. The other industry sector primarily utilises electricity (38%), complemented by substantial shares of gas (18%) and relatively high levels of bioenergy (22%).

How much electricity does Southeast Asia use a year?

The ACs across Southeast Asia vary greatly in energy efficiency and keeping them running consumes over 100 TWh of electricity every year. More than 16% of all the electricity used in buildings in the region is for space cooling, growing to over 35% in 2050 in the STEPS.

Is Southeast Asia a good place to invest in energy?

Southeast Asia is a very dynamic region and a driving force behind global energy trends, with a projected rise in energy demand over the coming decades second only to India.

Does Japan have a good energy supply?

Japan is the third largest economy in the world and the fourth largest exporter, while local fossil energy resources are limited. Consequently, the current energy supply conditions in Japan are unmistakably sensitive to global issues such as energy security, a drawdown of energy resources and, above all, climate change [1,2].

NFPA 110 - Standard for Emergency and Standby Power Systems EGSA - Electrical Generating Systems Association - trade association made up of nearly 500 companies in the USA and around the world that design, manufacture, sell, distribute, rent, specify, service, and use on-site power equipment
