

EnOcean GmbH is the developer of the patented energy harvesting wireless technology marketed under the Dolphin brand. Headquartered in Oberhaching, near Munich, the company produces and markets self-powered wireless sensor solutions for batteryless applications in the Internet of Things, which are used for building and industrial automation, smart homes and LED light control.

The radio transmitter module PTM 535 from EnOcean enables the implementation of wireless sensors and switches without batteries. Key applications are handheld remote controls or industrial switches. PTM 535 can ...

The capability to communicate via the original EnOcean telegram structure creates a broad range of real world applications. All types of devices supporting RS485 data interchange can now be interfaced to the EnOcean radio. The flexibility of the RS485 ensures connectivity to programmable controllers including; PLCs, control systems, desk top and laptop computers. ...

EnOcean GmbH is the developer of the patented energy harvesting wireless technology marketed under the Dolphin brand. Headquartered in Oberhaching, near Munich, the company produces and markets self-powered wireless ...

The PTM 210 is a miniaturized batteryless switch modules (40 mm x 40 mm x 11.2 mm) which allow the realization of very slim on-wall mountable rocker switches or remote controls. Optionally, one or two switch rockers or up to four push buttons can be realized.

EnOcean bezeichnet einen vor allem in der Überwachung und Steuerung von Haus- und Gebäudetechnik genutzten herstellergreifenden Standard für batterieless Funksensorik.. Er unterscheidet sich von anderen in der Gebäudeautomation genutzten Funksensorik-Systemen wie z. B. Z-Wave vor allem durch einen sehr niedrigen Energieverbrauch. Dieser unterscheidet ...

EnOcean Advanced Devices, ...

EnOcean GmbH manufactures and markets wireless sensor solutions for use in buildings and industrial installations. It offers energy harvesting technology, sensors, and radio frequency communication in a single solution for building and home automation, lighting, industrial, automated meter reading, and environmental applications.

EnOcean GmbH is the developer of the patented energy harvesting wireless technology marketed under the Dolphin brand. Headquartered in Oberhaching, near Munich, the company produces ...

Next generation EnOcean products including the brand new TCM 600/615 EnOcean transceiver platform by Matthias Kassner, EnOcean GmbH. Matthias Kassner is Vice President Product Marketing at EnOcean GmbH. Before joining EnOcean in 2013, he worked at Texas Instruments (TI) for 12 years in different positions from SW developer and Wireless Field ...

By Andreas Schneider, Chief Marketing Officer, EnOcean GmbH EnOcean GmbH is the originator of patented self-powered wireless technology. Headquartered in Oberhaching near Munich, the company manufactures and markets maintenance-free wireless sensor solutions for use in buildings and industrial installations. EnOcean products are based on a

USB 300 is a USB stick gateway which connects PC's, consumer devices & Wifi APs to the world of EnOcean radio products. The new version (stepcode DC and later) comes with an optimized PCB antenna for better range.

China Telecom Wuxi branch joined forces with Shanghai Hualian Lawson, officially launching the flagship Wuxi store. The store not only allows community residents to pay utility bills at ease ...

EnOcean Siegel „Battery-free by EnOcean" f&#252;r batterieleose Funksensoren Zeigen Sie der Welt, dass Ihre Produkte 100% batterieelos, 100% kabellos und 100% wartungsfrei sind. Aruba Wi-Fi Access Points und EnOcean-Sensoren

In early September, the EnOcean Alliance together with eight of its members attended Shanghai Intelligent Building Technology (SIBT), one of the largest shows for smart buildings in China. It was an impressive platform giving a great insight into the latest industry trends in this region. No doubt, China's building industry is booming.

EMCSA is an energy-harvesting wireless magnet contact sensor for EnOcean systems. Powered by a solar cell, EMCSA works absolutely maintenance-free. An integrated energy store allows operation for several days in total darkness. In dark surroundings, a coin cell battery can be retrofitted. The small housing can easily be mounted to windows or door frames or
