

Eon solar home The Netherlands

Why should you choose Eon solar panels?

Harness the sun's energy with solar panels from E.ON. Embrace renewable power and reduce your carbon footprint. Includes guarantee, install and finance options.

Will Eon use solarcloud in Germany?

E.ON will be using SolarCloud to explore the potential of the German market, with more than 1.6 million operators of solar systems today. According to E.ON, there are another 10 million roofs in Germany that are suitable for installing PV systems.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.

Are solar panels a good idea in the Netherlands?

One of the frequent reservations about solar energy in the Netherlands is the country's weather. Yes, the Netherlands may not boast the sunniest of climates, but solar panels don't necessarily require blazing sun to function effectively. They can generate power even on cloudy days, albeit at a reduced efficiency.

Who can benefit from Eon next's solar tariff?

Available to: Customers whose electricity is supplied by E.ON Next and have had solar panels and/or a battery storage system installed by E.ON Energy Installation Services Ltd or Eco2Solar Ltd from 1 October 2024. We'll reward you with 16.5p per kWh of electricity you export on a 12-month fixed-term export tariff.
