

Could gas-to-power help Equatorial Guinea develop a regional power economy?

For Equatorial Guinea, which enjoys a strategic position in the Gulf of Guinea, gas-to-power offers the potential to anchor the development of a regional power economy. Given its current energy output and relatively small population of 1.4 million, the country has been able to meet domestic energy demand with self-produced power to date.

Is gas-fired power generation a viable solution for Equatorial Guinea?

As Equatorial Guinea emerges as a leader in regional gas monetization, gas-fired power generation represents an attractive solution to fulfilling national electrification objectives, while meeting global decarbonization demands.

Should oil companies lift LNG cargoes in Equatorial Guinea?

As a result, Equatorial Guinea is inviting independent and state-backed oil companies to lift LNG cargoes, with incentives of an attractive royalty scheme and strong government support.

Equatorial Guinea - Oil, Agriculture, Fisheries: Equatorial Guinea's economy traditionally depended on three commodities--cocoa (from the cacao tree), coffee, and timber--but the discovery and exploitation of petroleum and natural gas changed the country's economic profile virtually overnight in the 1980s. Petroleum now accounts for the vast majority ...
