

Should Sri Lanka use water bodies for solar power generation?

With limited land availability for traditional solar installations,utilizing water bodies for solar power generation presents a smart and innovative solution. This strategy supports Sri Lanka's ambitious national goal of generating 70% of its electricity from renewable sources by 2030.

Can agrivoltaics improve food security and energy access in Sri Lanka?

Agrivoltaics offers a unique opportunity to address both energy security in a land constrained country like Sri Lanka and its agricultural challenges. This project will serve as a model for wider applications for achieving sustainable food security and energy access in the country.

Where are floating solar projects located in Sri Lanka?

The first ever floating solar projects in Sri Lanka located in Kiriiban Wewa and Chandrika Wewahave been connected to the grid officially on a ceremony held on 27.11.2024. This signifies the addition of 2 MW generation capacity in the national grid.

Is Sri Lanka implementing a floating solar pilot project?

In a pioneering effort,Sri Lanka Sustainable Energy Authority is currently implementing two floating solar pilot projects,each with a capacity of 1 MW in Kiriibban Wewa in the Monaragala district and Chandrika Wewa in the Rathnapura district.

What is Sri Lanka's first agrivoltaic project?

Sri Lanka drives its first-ever Agrivoltaics Project in Hanthana. The days are not far away when our agricultural land can deliver electricity while continuing to feed the nation. Imagine a greenhouse structure filled...

4 ???· Sri Lanka Sustainable Energy Authority has the legal basis for securing such land, but its powers have not been effectively used. Land use planning in the context of utility scale wind ...

1 ??· "A comparison of these global prices with the price offered by the Adani Green Energy to Sri Lanka, US cents 8.26, leaves no room for doubt of the disingenuous nature of the project and possible ...

Sri Lanka is blessed with renewable energy sources of magnitude which is far beyond the energy needs of the country, covering all sectors, many fold even with the projected growth over many decades, This is ...

By facilitating the adoption of renewable energy, energy wheeling plays a crucial role in mitigating Sri Lanka"s carbon footprint. By reducing reliance on fossil fuels, it contributes to the nation"s efforts to combat ...

ERMA network brings together a growing number of organisations from the public and private sectors covering the entire raw materials value chain. The alliance is initially focused on the most pressing needs, that is, increasing EU resilience in the supply chains for rare earth magnets and motors, batteries, and fuel cells.

Closer to home, Sri Lanka and the Maldives has been a part of Thermax's international business for over two decades. Thermax provides sustainable energy and environment solutions for several businesses in these countries, cherishing the confidence of more than 600 customers across many sectors like rubber, tea, garments, food and the hospitality sector.

A comprehensive study on energy poverty in Sri Lanka, like ours, will provide valuable insights into the post-war development policy agenda in the country. Additionally, by highlighting the extent of multidimensional energy poverty in the country, this study will enhance renewed policy and research interests and public awareness about energy ...
