

How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided EUR5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

How many energy companies are there in Estonia?

The six companies are Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia, and three out of the ten are heat storage projects, with the remainder for storing electricity.

Who is Eesti Energia?

Eesti Energia is a state-owned utility operating in Estonia but also abroad. Image: Eesti Energia. A state agency in Estonia has provided EUR5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia.

How will a solar energy storage facility work in Estonia?

The proposed facility is planned to be installed in Ida-Viru county in Estonia's northeast. It will provide one hour of storage capacity, during which it will release electricity equal to the consumption of around 150,000 households. It will enable the storage of solar power produced by 2,500 residential installations for over two hours.

What are Estonia's networking opportunities?

Our networking opportunities have been described as second to none by industry professionals. Estonia has provided EUR5.2 million in grants for energy storage projects, including an 8MWh battery storage unit from Eesti Energia.

How much solar power does Estonia have in 2022?

That makes another record-breaking year for solar on the continent, with a total of 10 GW more capacity added than expected. Regarding solar power per capita, Estonia has emerged as one of the new leaders. The country is ranked 6th among 27 EU members, with 596 Watt per capita in 2022, jumping from 405 in 2021.

Estonia is taking a leap forward in the world of hydrogen technologies. It has already established the first-ever nationwide hydrogen valley and now moves forward.. The recent Estonian Hydrogen Days 2023 event in Tartu was the perfect platform to showcase the country's commitment to economic growth and climate protection.

Based on the zero-emission principle, the ferry can operate in winter conditions in Estonia with lower energy costs. "Thanks to new technologies and an innovative hull design, the energy consumption of the new ferry is

about 20% lower than the previous generation of ferries," Laasma noted.

The problems and results of the design process of the first zero-energy building in Estonia are described through a case study. The current study showed that it is possible to reach zero-energy ...
