What does Eswatini's COP26 pledge mean for Swazi energy?

The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030. This pledge signifies a crucial step toward Swazi energy independence, bridging the stark urban-rural economic divide and promising new employment and educational opportunities.

#### What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy,the convergence of local innovation,international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

#### Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

#### What is the main energy source in Eswatini?

Hydroelectric powercurrently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

#### What is the climate like in Eswatini?

Eswatini also known as Swaziland, a landlocked nation located in Southern Africa, is characterized by a subtropical climate that features wet and hot summers as well as cold and dry winters.

#### What benefits does Eswatini offer?

Eswatini offers numerous foreign business incentives, including tax deductions, duty-free imports of machinery and repatriation of profits, ensuring mutual benefits for investors and the Swazi people. The electrification of Eswatini promises its energy-deprived citizens more than just basic household power.

Eswatini adopted its first economy-wide emissions reduction target of 5% by 2030, or 14% with financial support. The NDC provides measures for mitigation and adaptation across sectors, which include increasing the share of renewable energy (solar, wind, biomass and hydro) to 50% in the electricity mix by 2030 relative to 2010, and landscape ...
