Will AGL build a 500 MW battery near Tomago Aluminium Smelter?

Image: Enerven Energy utility AGL has revealed it plans to build a 500 MW battery with four hours of dispatchable capacity next to the Tomago aluminium smelter near Newcastle on the New South Wales (NSW) Central Coast as part of its ambition to add 12 GW of new wind, solar and energy storage to its portfolio by 2035.

Which batteries have been built and operated by AGL?

The Torrens Island and Broken Hill batteries are the first to be built and operated by AGL, although it has had the operating contracts for the Dalrymple North battery in South Australia and the new Wandoan South battery in Queensland.

Is AGL spending a lot on batteries?

Accordingly, AGL is spending a decent chunk on batteries, including the "grid forming" 500MW, two-hour Liddell battery - at the site of the shuttered Liddell coal plant - although that project now has the support of joint funding by the NSW and federal Labor governments, through last year's capacity tender.

How many battery assets does AGL count?

AGL counts 800MW of grid-scale battery assets either in operation, in testing or under construction, including Torrens, Broken Hill - currently in testing - and the Liddell battery at the Hunter Energy Hub.

Where are AGL Energy storage vessels made?

The company currently makes its Energy Storage Vessels in Silicon Valley, but in 2025 it expects to begin volume production at a new plant in Kentucky. AGL will pilot the small (180 kilowatt/360 kilowatt-hour) version of the technology for two years from 2025 at its Torrens Island site, north of Adelaide.

Where will AGL's next battery be located?

AGL COO Markus Brokhoff says the next battery on which the company expects to take final investment decision will be in Queensland, for a project he says is "just at the mature approval stage." Already in Queensland, AGL operates the 100MW/150MWh Wandoan South battery, under a 15-year contract with its owner, Vena Energy Australia.

A recently-completed BESS project for tender winner AGL, at Torrens Island, South Australia. Image: W&A;rtsil&A;-AGL. Three large-scale battery storage projects and one virtual power plant were the winners of a recent ...

This document is a public report issued as part of the Knowledge Sharing commitments of AGL for the Broken Hill Battery Energy System (BHBESS) Project, in accordance with the Funding Agreement between AGL and the Australian Renewable Energy Agency (ARENA), which has ...

energy/broken-hill-battery-energy-storage-system?zcf97o=vlx3ap. ...

Broken Hill has a long history as a mining city, which brought industry to the area in the mid-20 th Century as silver ore was discovered. More recently, the area has become home to solar PV and wind installations, including AGL's 53MW Broken Hill PV plant which went online in 2016 and its 200MW Silverton wind farm which went online a year later.

Australian energy giant AGL has officially opened its first operational grid-scale battery with the 250 MW/250 MWh facility at its Torrens Island power station site in South Australia now live. ... The Torrens Island energy storage system comprises 218 battery cabinets housing more than 6,000 battery modules.

Major Australian energy retailer AGL has contracted Finnish technology company Wärtsilä to supply a battery energy storage system (BESS) for a 250MW / 250MWh project at Torrens Island, South Australia. It marks AGL's first-ever grid-scale battery project and will be one of Australia's biggest BESS projects so far.

AGL's Broken Hill battery became operational in August 2024. The 50 MW, one-hour lithium-ion battery, plays an important role in supporting renewable energy supply. It's one of several grid-scale batteries in our battery portfolio providing energy storage for the National Electricity Market (NEM). It also contributes to our target to add 12 ...

The nameplate capacity of a battery refers to its total storage capacity - not all of this can be used for charging and discharging energy. Terms and conditions (PDF) apply. ... AGL recognises the Aboriginal and Torres Strait Islander peoples as the Traditional Owners of the lands on which we work, and we acknowledge those communities ...

Biggest battery in Queensland to double in size after AGL signs up to a 10-year "virtual" contract as big generators lock in to battery storage. Giles Parkinson Aug 27, 2024

Australian utility AGL has furthered its plans to develop 850MW of large-scale battery storage across a number of sites in the country, announcing a new project in Victoria. Last week AGL said that it intends to build a project in South Australia of up to 250MW / 1,000MWh, which would be one of the largest battery energy storage systems (BESS ...

Energy utility AGL has revealed it plans to build a 500 MW battery with four hours of dispatchable capacity next to the Tomago aluminium smelter near Newcastle on the New South Wales (NSW) Central Coast as ...

The company aims to have 850 MW of grid-scale batteries in the fiscal year through June 2024, up from 30 MW today. In addition to the energy storage project in Liddell, which will have a ...

On Saturday, AGL went a mega-step further towards achieving its goal of 850 MW of new large-scale battery

Ethiopia agl battery storage

storage integrated into its generation portfolio by FY 2024, with the announcement of a 250 MW, four-hour-duration battery system to be built in stages on the site of its Torrens Island Power Station in South Australia.

French renewable energy and storage developer Neoen is to double the size of its newly completed Western Downs battery in Queensland after signing a 10-year "virtual battery" contract with AGL ...

Two energy storage technology companies have been confirmed as suppliers for up to 1,000MW of grid-scale battery storage for AGL under non-exclusive framework agreements. AGL Chief Operating Officer, ...

The purchase of Firm Power is to add a total of 6.1 GW of grid-scale battery energy storage projects to AGL's portfolio with the group's development pipeline including 21 mid-sized battery projects, ranging between 200 MW and 500 MW and two- to eight-hours storage duration. Again, much of the capacity is in Queensland (2.7 GW) while there ...

AGL said in a press release today that the two companies have been "secured under non-exclusive framework agreements" to supply the battery storage systems. AGL, with around 4.2 million customers across its gas and electricity retail businesses, has a target already in place of deploying 850MW of grid-scale energy storage by the 2024 ...
