

# Ethiopia swire energy

What is energy sector support in Ethiopia?

The focus of energy sector support in Ethiopia is aligned with Power Africa 2.0 objectives, which include advancing sustainable development through private sector led partnerships, promoting economic prosperity, and an increased focus on the enabling environment, transmission, and distribution. Technical assistance provided includes:

How does Ethiopia produce electricity?

The country focuses on the production of electricity from a mix of cheap and clean renewable primary energy sources like hydropower or wind power. Ethiopia has a total identified economically feasible potential of 45 GW of hydropower and 1,350 GW of wind power.

Why does Ethiopia need a secondary energy sector?

That together with the population growth in Ethiopia results in issues like deforestation. Ethiopia aims at economic development and removal of poverty and to replace the use of wood by alternatives. This makes the secondary energy sector (with electricity) most relevant for these efforts.

What is energy in Ethiopia?

Energy in Ethiopia includes energy and electricity production, consumption, transport, exportation, and importation in the country of Ethiopia. Ethiopia's energy sector is crucial for its development, with wood being a primary energy source, leading to deforestation challenges.

Is wind power a viable alternative to hydro power in Ethiopia?

By taking these developments into account, the Ethiopian Ministry of Water and Energy revised its numbers on an economically feasible wind power potential within only a few years from 10 GW to 1,350 GW. Wind power is ideally suited to complement hydro power.

Which sector consumes the most energy in Ethiopia?

All in all, energy consumption in Ethiopia continues to be dominated by the residential sector, which accounts for 95% in 1990 and 88% in 2018. During the same period, the shares of industry and transport sectors grew, respectively, from 1.3 to 3.7%, and from 1.8 to 5.5%.
