Why should you choose ExaGrid tiered backup storage?

Our team is trained to ensure that your system is properly sized and supported to meet your growing data needs. With ExaGrid's Tiered Backup Storage, each appliance in the system brings with it not only disk, but also memory, bandwidth, and processing power--all the elements needed to maintain high backup performance.

Why is ExaGrid the leader in backup storage?

Learn why ExaGrid is the leader in backup storage. ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid has the only non-network-facing tiered backup storage solution with delayed deletes and immutable deduplication objects.

How fast is ExaGrid backup storage?

ExaGrid offers various-sized appliance models that can be mixed and matched with up to 32 appliances in a single scale-out system. The largest scale-out system can process data at a rate of 3X faster than any other backup storage on the market, with an ingest rate of 488TB/hr. ExaGrid is the expert in backup storage--it's all we do.

How many ExaGrid tiered backup storage models are there?

The ExaGrid Tiered Backup Storage product line consists of seven appliance models. Each appliance is sized for a full backup and for long-term retention. Any ExaGrid appliance can be mixed and matched in the same scale-out system with any other size or age appliance, allowing customers to buy what they need as they need it.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage. When comparing ExaGrid appliances deduplication in the backup application software, it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

Will ExaGrid go up more than 3% per year?

tion - won't go up more than 3% per year About ExaGrid ExaGrid provides Tiered Backup Storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid's Landing Zone provides fo

ExaGrid's full appliances in a GRID is a scale-out storage approach for backup that brings full server resources (processor, memory, and bandwidth) with all capacity. This approach ensures a fixed backup window as data grows and eliminates expensive forklift upgrades in the future.

The ExaGrid EX Series was originally designed as a scale-out NAS system but has since been optimized to be a backup-to-disk target. Since the system presents a standard NFS or CIFS/SMB interface, it can also support other file-based applications, especially secondary storage workloads.
