Faroe Islands cellcube corning

Corning"s Closed System CellCube® Modules are now available with CellBIND® surface treatment. A complete range of standard closed system accessories integrate seamlessly with AseptiQuik® and MPC connectors for total adherent cell culture workflow solutions. Stands and carts are also available to link multiple CellCubes, enabling modular scale out in a small ...

The Corning CellCube system provides a compact, perfusion-based method for the mass culture of attachment-dependent cells. CellCube modules are made of polystyrene plates joined together to create thin, sealed laminar flow spaces between adjacent plates and are coated with either a Tissue Culture-treated growth surface or Corning CellBIND ® surface to enhance attachment.

Corning® CellCube® Tubing Manifold, 3/8"ID Thermoelastic Tubing, Cross Connection, 4 Aseptic Connectors Product Number 3235. Corning EcoChoice(TM) products are produced, packaged, and/or distributed in an environmentally friendly manner following United States Government Federal Trade Commission (FTC) Guidelines Learn More.

6. Can I reuse Corning® CellCube® modules? Corning CellCube modules cannot be reused and should be properly discarded after use according to site-specific guidelines. However, the Corning CellCube system can be used as part of seed train, wherein cells harvested from one module can be used to seed new module(s). Protocol 7.

CellCube system, the design of the modules allows for reliable distribution of nutrients and oxygen with low differential gradients across all cells within the modules. The CellCube Module is an integral, encapsulated, sterile, single-use device that is 100% pressure-hold tested before shipment. It is comprised of a series of parallel, styrene plates joined to create thin, sealed, laminar flow spaces between adjacent plates. Each culture plate receives proprietary tissue culture treatment prior to assembly to ensure dense, uniform cell growth.

The CellCube Culture System Clean Room Cart is a device designed for simplified installation, filling, seeding, operation and harvesting of up to four 100-layer CellCube modules. The cart is a stainless steel, autoclavable, mobile rack that can hold four CellCube modules in a small footprint. The modules can be rotated 360 degrees, and has an adjustable wheelbase which can be ...
