

Faroe Islands sunstone power

Can tidal energy be 100% renewable in the Faroe Islands?

Minesto is part of one of the world's most ambitious energy transition schemes in the Faroe Islands, where tidal energy can play an essential role in reaching 100% renewable by 2030. CEO Dr Martin Edlund: "During third quarter we have completed the business case for project investment in Hestfjord Phase 1 (Faroe Islands) based on...

How is energy produced in the Faroe Islands?

In the Faroe Islands, energy is produced primarily from hydro and wind power, with oil products being the main energy source. Mostly consumed by fishing vessels and sea transport.

Does the Faroe Islands have a solar park?

The Faroe Islands have a solar park with a 250 kW capacity in Sumba. It is expected to produce 160 MWh/year (i.e. a capacity factor of 7.3% and equivalent to 35 tons of oil), mainly in the summer when rain and wind are low.

How much electricity is renewable in the Faroe Islands?

In the Faroe Islands, more than 80% of the power for the main grid was renewable on 50 days in 2022. The municipality-owned company SEV is the main electricity supplier, providing approximately 90% of the total production, with private producers contributing the remaining percentage.

Are the Faroe Islands a sustainable country?

Did you know that the Faroe Islands is one of the world's leading nations in producing sustainable electricity with over 50% of the nation's electricity deriving from renewable energy sources? There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind.

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.
