

Fengjun 5 generator bearing disassembly diagram

How do I select parts for my generator set?

Using the model and specification number from your generator set nameplate, select parts that apply to your set. Unless otherwise mentioned in the description or page heading, parts are interchangeable between models. Throughout this catalog right and left sides are determined by facing the engine end (front) of the set. 50 60

How do you lift a single bearing generator?

The AVR access covers are designed to be removed while the generator is on load. Lift the generator using the points provided with the aid of a spreader and chains. The angle on the chains must be vertical during the lift. Do not lift single bearing generators without the, securely fitted, transit bar.

What is a BGD & NHD generator manual?

Improper service- BGD and NHD series commercial vehicle generator sets. This manual describes troubleshooting, disassembly, repair, reassembly, and adjustments to the engine, generator, and control system. The technician must understand basic principles of electrical generation and gasoline engine operation.

How are parts arranged in a generator set?

Parts are arranged in groups of related items and each illustrated part is defined by a reference number corresponding to the same reference number in the parts list. Parts illustrations are typical. Using the model and specification number from your generator set nameplate, select parts that apply to your set.

How often should a generator bearing be replaced?

Replace the bearing after 12 months in storage. (See the Maintenance section) Dynamic balancing of the generator rotor assembly has been carried out during manufacture in accordance with BS 6861 Part 1 Grade 2.5 to ensure vibration limits of the generator are in accordance with BS 4999 Part 142.

How do I know if my Stamford generator is genuine?

Genuine parts may be recognised by the STAMFORD name. We recommend the following for Service and Maintenance. In critical applications a set of these service spares should be held with the generator. When ordering parts the machine serial number or machine identity number and type should be quoted, together with the part description.
