

Fiji commercial power energy

Why does Fiji rely on fossil fuels?

National energy production and consumption in Fiji remains highly dependent on imported fossil fuels in part due to the current demands of the transport sector and the ongoing reliance on thermal power plants to supplement renewable energy sources within Fiji's electricity sector.

How does Fiji generate electricity?

Close to 60 percent of Fiji's electricity generation is derived from hydropower, while remote areas and outer islands are dependent on imported fossil fuels and biomass. Fiji's 20-year National Development Plan calls for all power to be generated from renewable sources by 2030.

What is the future of Fiji's energy sector?

The future of Fiji's energy sector will continue to be shaped by these factors. Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels.

Who is the largest consumer of energy in Fiji?

The transport industry is the largest consumer of energy, followed by the commercial, industrial, and domestic sectors. Energy Fiji Limited (EFL) is the main generator and distributor of grid-based power to an estimated 90 percent of the population on the main islands of Viti Levu, Vanua Levu, and Ovalau.

Will Fiji be able to produce 100% of electricity by 2030?

10.3.1 To derive as close to 100% of electricity services from renewable energy sources as possible by 2030. In keeping with Fiji's climate change commitments and development goals, Fiji will systematically scale up the transition to renewable energy-based electricity production.

Why is Fiji a good place to invest in electricity?

Fiji offers a favorable environment for private sector investment in the electricity sector. The Fijian Government provides an enabling environment for participation. Opportunities exist for replacing fossil fuels used in land transport through expanding the use of biofuels, hybrid, and electric vehicles.

Fiji is heavily dependent on imported petroleum products as a source of energy for its industrial, commercial and transportation sectors, as well as to supplement electricity generation for domestic consumption. ... This study under the "Fiji Renewable Energy Power Project (FREPP) intends to quantify and ...

Vision Energy Solutions (VES) is the power generation division of Vision Investments Limited of Fiji. Our company delivers comprehensive energy solutions to residential, commercial, and power plant customers. Focused on renewable energy, our systems are designed to generate electricity sustainably for years.
